CARD # 01

PROPANE

One molecule represented in four different chemical languages

C_3H_8

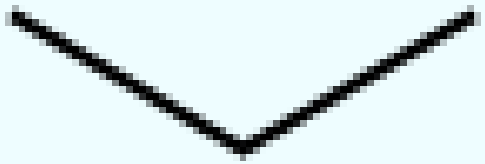

MOLECULAR FORMULA

LEWIS STRUCTURE

$CH_3CH_2CH_3$

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

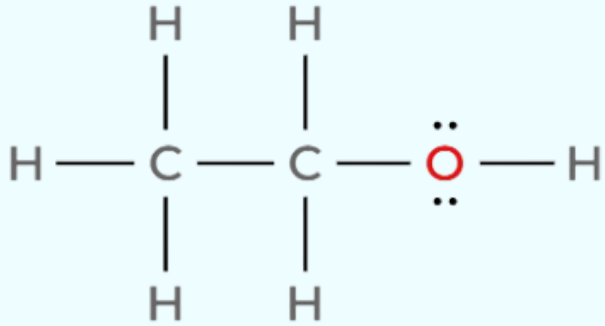

CARD # 02

ETHANOL

One molecule represented in four different chemical languages

C_2H_6O

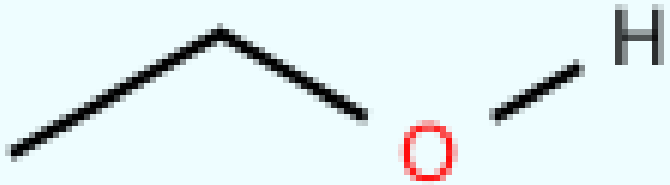

MOLECULAR FORMULA

LEWIS STRUCTURE

CH_3CH_2OH

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

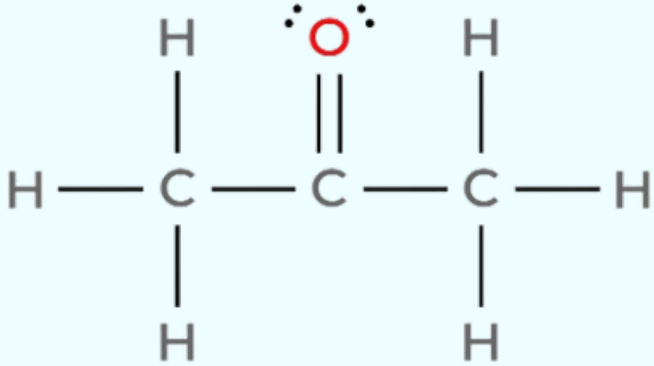

CARD # 03

ACETONE (Propan-2-one)

One molecule represented in four different chemical languages

C_3H_6O

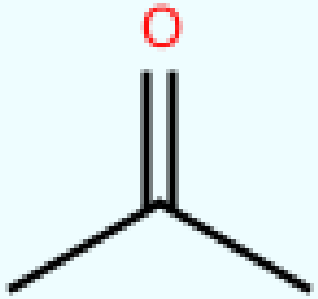

MOLECULAR FORMULA

LEWIS STRUCTURE

CH_3COCH_3

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

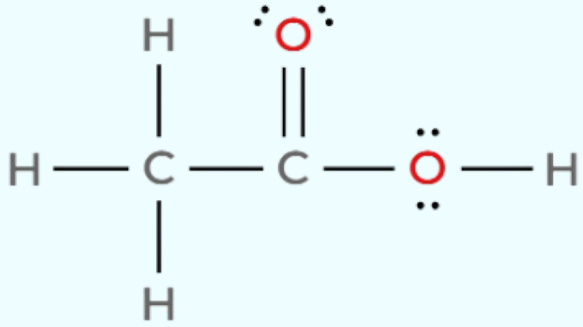

CARD # 04

ACETIC ACID (Ethanoic acid)

One molecule represented in four different chemical languages

$C_2H_4O_2$

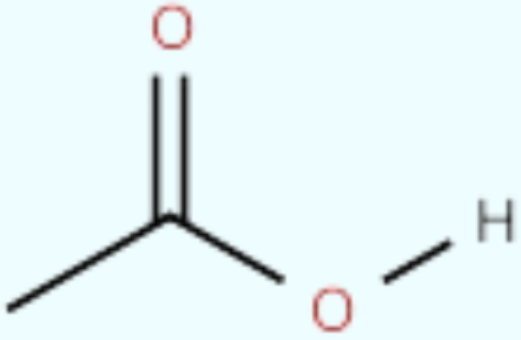

MOLECULAR FORMULA

LEWIS STRUCTURE

CH_3COOH

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

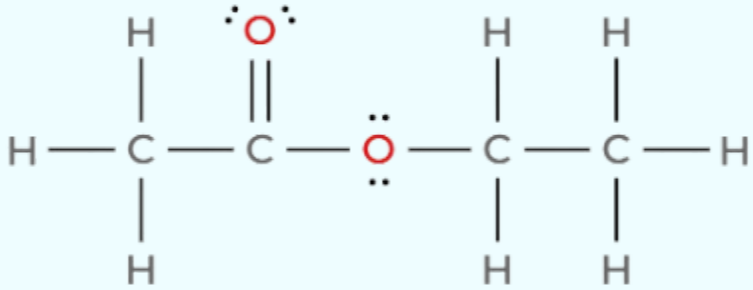

CARD # 05

ETHYL ACETATE (Ethyl ethanoate)

One molecule represented in four different chemical languages

$C_4H_8O_2$

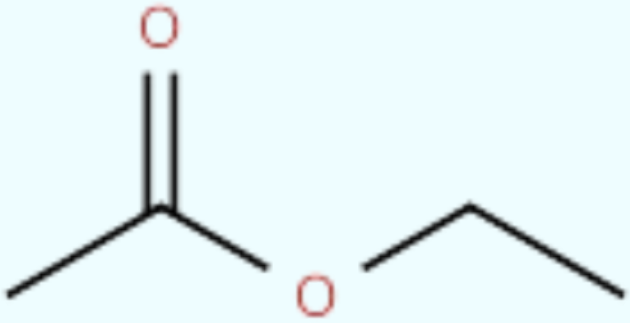

MOLECULAR FORMULA

LEWIS STRUCTURE

$CH_3COOCH_2CH_3$

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

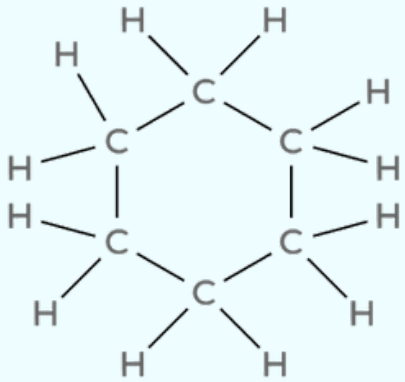

CARD # 06

CYCLOHEXANE

One molecule represented in four different chemical languages

C_6H_{12}

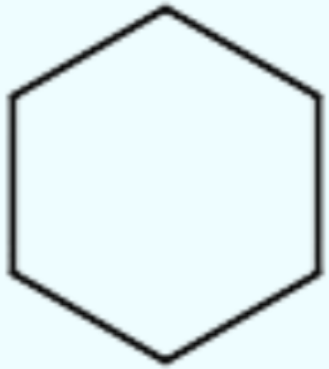

MOLECULAR FORMULA

LEWIS STRUCTURE

$(CH_2)_6$

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

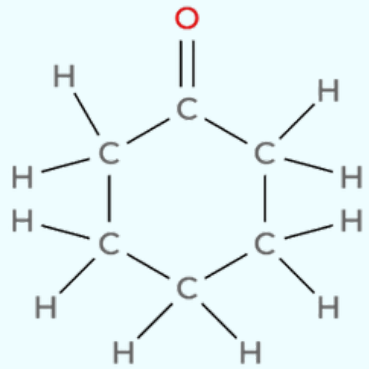

CARD # 07

CYCLOHEXANONE

One molecule represented in four different chemical languages

$C_6H_{10}O$

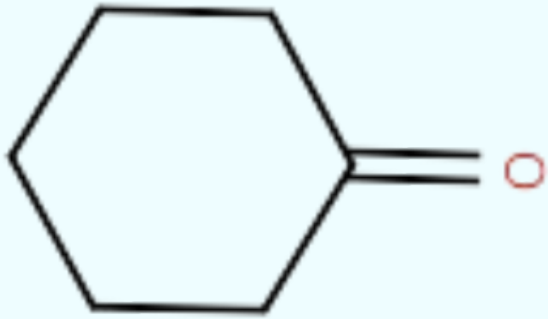

MOLECULAR FORMULA

LEWIS STRUCTURE

$(CH_2)_5CO$

CONDENSED STRUCTURAL FORMULA

BOND-LINE FORMULA

Atom count verified | valence checked | same connectivity across all representations.

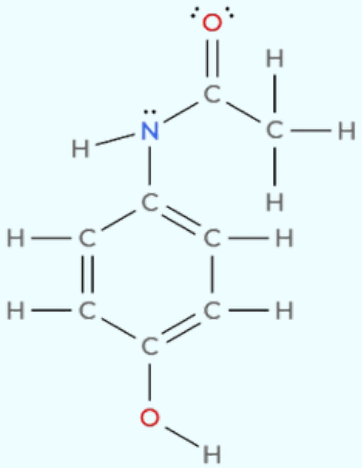

CARD # 08

ACETAMINOPHEN (Paracetamol)

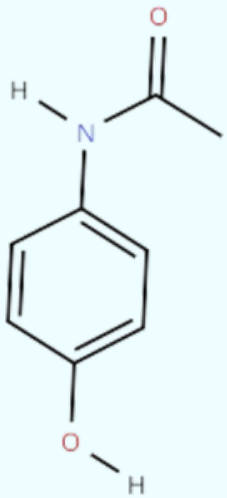

One molecule represented in four different chemical languages

$C_8H_9NO_2$

MOLECULAR FORMULA

LEWIS STRUCTURE

BOND-LINE FORMULA

$HOC_6H_6NHCOCH_3$

CONDENSED STRUCTURAL FORMULA

Atom count verified | valence checked | same connectivity across all representations.

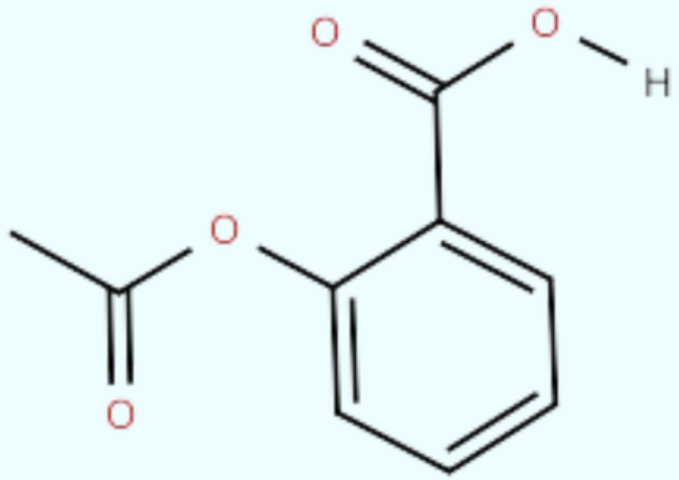

CARD # 09

ASPIRIN (Acetylsalicylic acid)

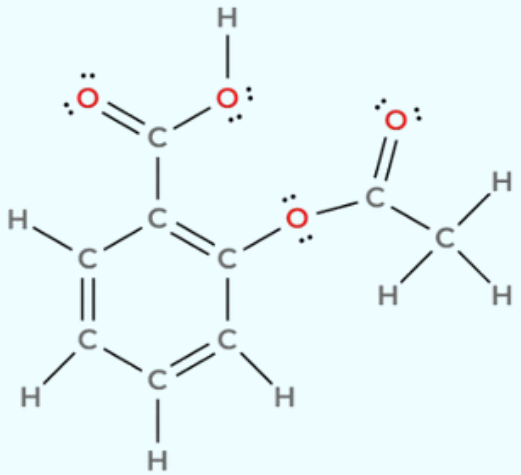

One molecule represented in four different chemical languages

$C_9H_8O_4$

MOLECULAR FORMULA

BOND-LINE FORMULA

LEWIS STRUCTURE

$CH_3COOC_6H_4COOH$

CONDENSED STRUCTURAL FORMULA

Atom count verified | valence checked | same connectivity across all representations.

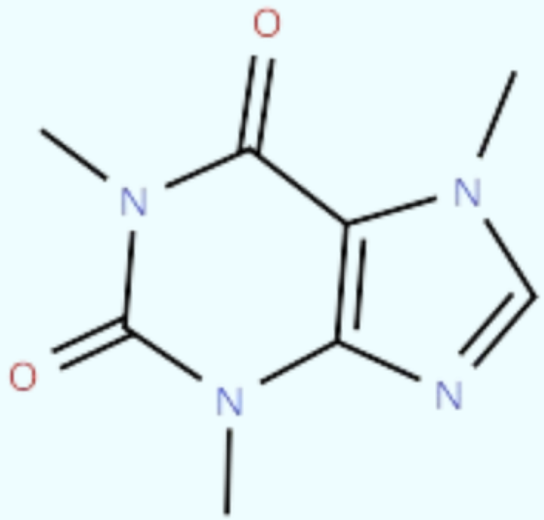

CARD # 10

CAFFEINE

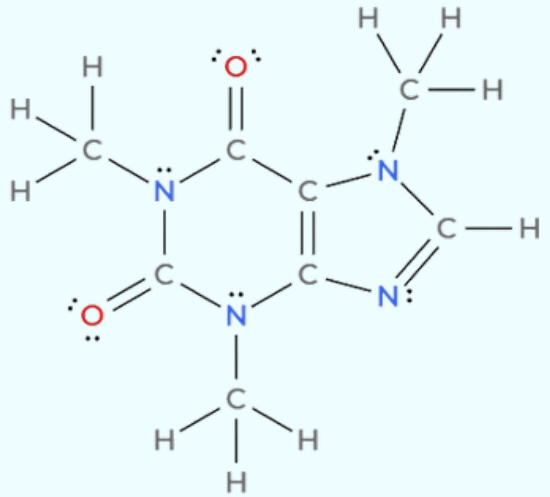

One molecule represented in four different chemical languages

$C_8H_{10}N_4O_2$

MOLECULAR FORMULA

BOND-LINE FORMULA

LEWIS STRUCTURE

$CH_3N(C=O)C(N(C)C=O)=NC=N1$

CONDENSED STRUCTURAL FORMULA

Atom count verified | valence checked | same connectivity across all representations.
